Hazardous Weather

Hazardous Weather

Severe Thunderstorm Potential - 3 pm to 7 pm

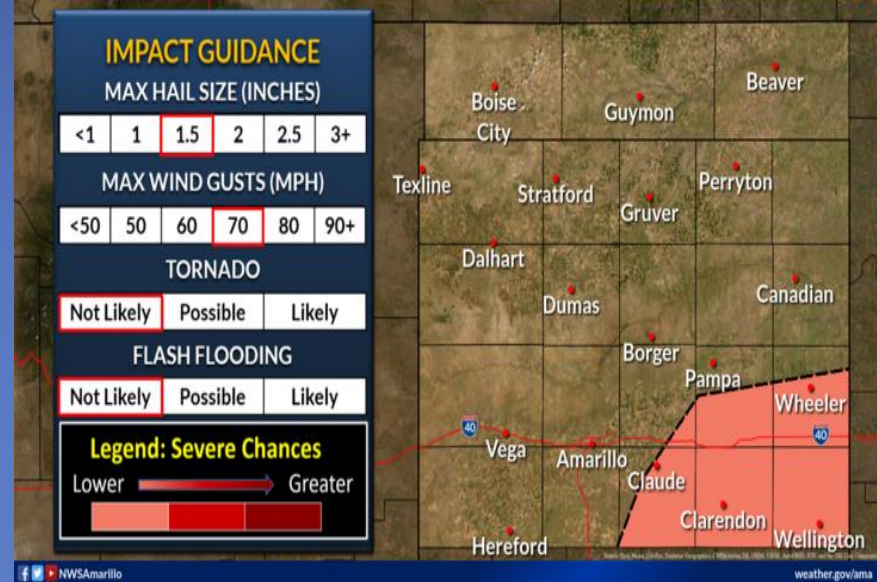

Weather Forecast Office
Amarillo, TX
Issued Jul 10, 2021 3:02 AM CDT

If thunderstorms can develop across the eastern Texas Panhandle, then they could become severe with large hail and damaging winds.

Severe Thunderstorm Potential - 7 pm to 12 am

Weather Forecast Office
Amarillo, TX
Issued Jul 10, 2021 3:06 AM CDT

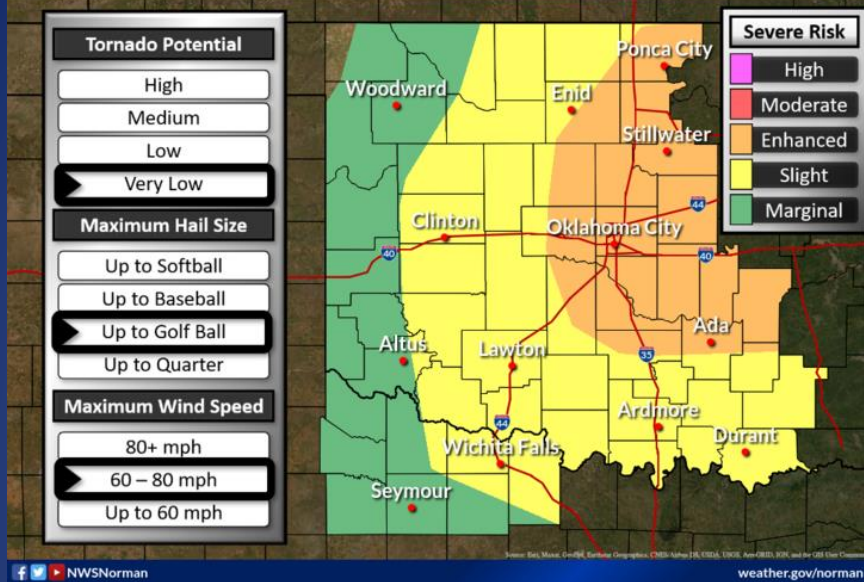

If thunderstorms can develop across the eastern Texas Panhandle, then they could become severe with large hail and damaging winds.

Hazardous Weather

Late Saturday/Early Sunday | Severe Potential

Timing: 4 PM Saturday to 4 AM Sunday.

Weather Forecast Office
Norman, OK
Issued Jul 10, 2021 7:38 AM CDT

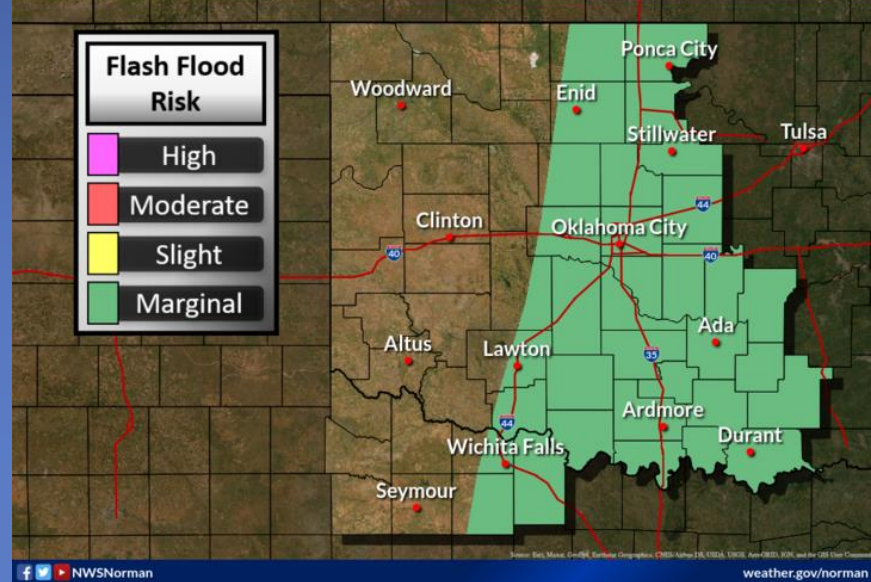

Severe storms are expected late Saturday and Saturday night. Storms are expected to form near the Kansas border late in the afternoon and spread south and east through the evening and overnight hours. Damaging winds will be primary hazard.

Late Saturday/Early Sunday | Flash Flood/Flood Potential

Timing: 4 PM Saturday to 4 AM Sunday.

Weather Forecast Office
Norman, OK
Issued Jul 10, 2021 2:45 AM CDT

Thunderstorms this afternoon through overnight may produce locally heavy rainfall. There is a marginal risk of flooding generally near and east of a line from Medford to Enid to Lawton to Wichita Falls.

Hazardous Weather

Late Tonight: Storm Chances Increase North

Weather Forecast Office
Fort Worth, TX

Showers and storms shift south with a cold front

Issued July 10, 2021 3:13 AM CT

A cold front moves south across Oklahoma late Saturday, then across the Red River before sunrise Sunday. The best chances for a few severe storms will be within the yellow-shaded region after midnight.

Potential Threats

- Damaging Winds
- Hail, mostly sub-severe
- Frequent lightning

The cold front moves south to near I-20/30 early Sunday morning.

The cold front and lingering outflow boundaries will likely become a focus for more thunderstorm development later in the day.

f t NWSFortWorth

weather.gov/fortworth

A rare July cold front will bring increasing chances of showers and storms mainly after midnight for areas generally north of a Stephenville, to Waxahachie, to Athens line. The highest chances will be north of I-20 (I-30 in the East). A few strong to severe storms will be possible across the yellow shaded area, mainly between midnight and sunrise Sunday. Damaging winds are the primary threat, though some hail will be possible with the most robust storms. Central Texas remains storm free but will see their chances increase during the day Sunday.

Severe Risk – Tonight-Early Sunday AM

Weather Forecast Office
Shreveport, LA

Valid through Sunday 7:00 AM CDT

Issued July 10, 2021 5:06 AM CT

70 - 80 mph
60 - 70 mph

f t NWSShreveport

Primary Threats:
Damaging Winds
Large Hail

Can't Rule Out:
Isolated Tornado
Localized Flash Flooding

Timing:
Late Tonight through
early Sunday morning

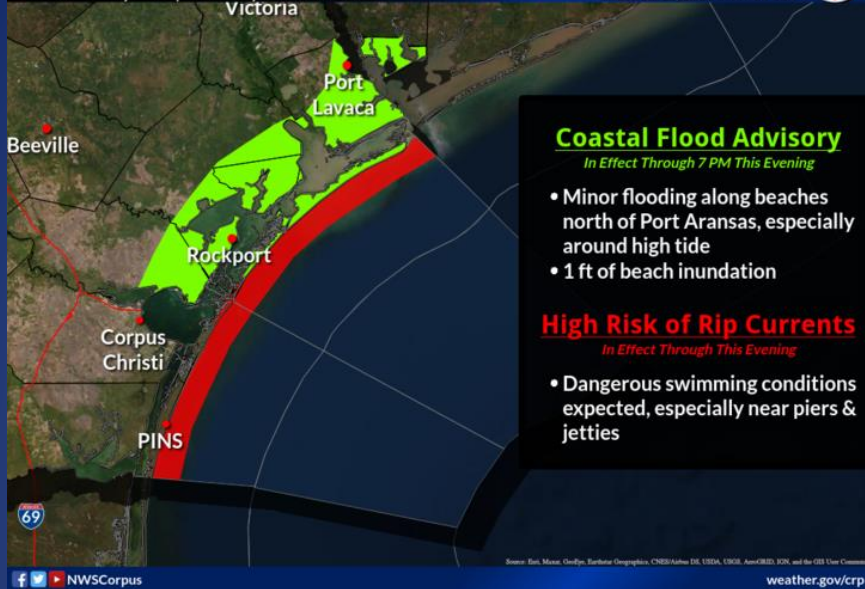

The threat of severe weather will increase late tonight over the northern sections of the region. This will be associated with an intense linear complex of thunderstorms shifting south ahead of a rare July cold front. Damaging wind gusts will be the primary threat with these storms while hail and an isolated tornado cannot be ruled out. Localized heavy rain may also pose a flash flooding threat in isolated locations.

Hazardous Weather

Hazardous Beach Conditions

Beach Roads May Flood | Water May Reach the Dunes
Victoria

Weather Forecast Office
Corpus Christi, TX
Issued Jul 10, 2021 6:00 AM CDT

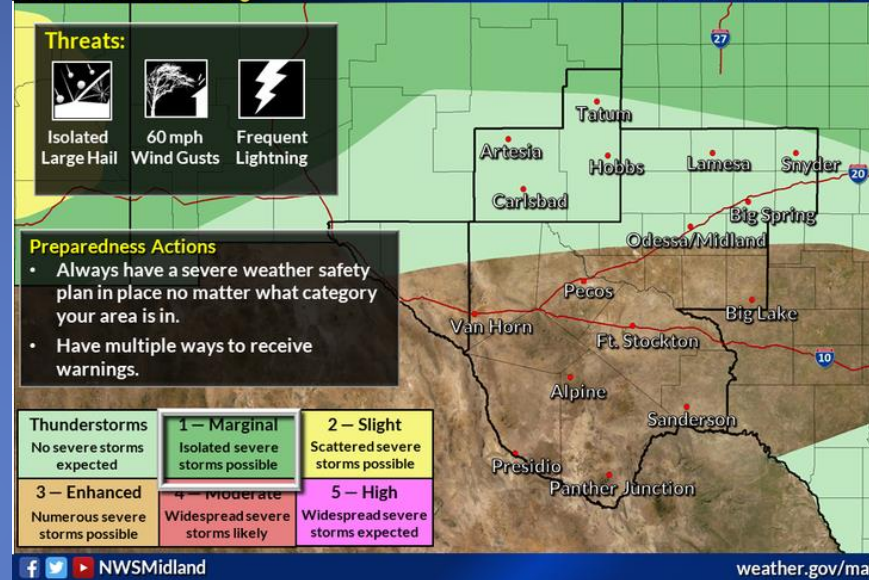

A Coastal Flood Advisory is now in effect through 7 PM this evening for all beaches from Port Aransas to Port O'Connor. Around 1 foot of inundation is expected. In addition, there is a **HIGH** Risk of rip currents along area beaches through this evening. Very dangerous swimming conditions are expected today!

Severe Weather Outlook

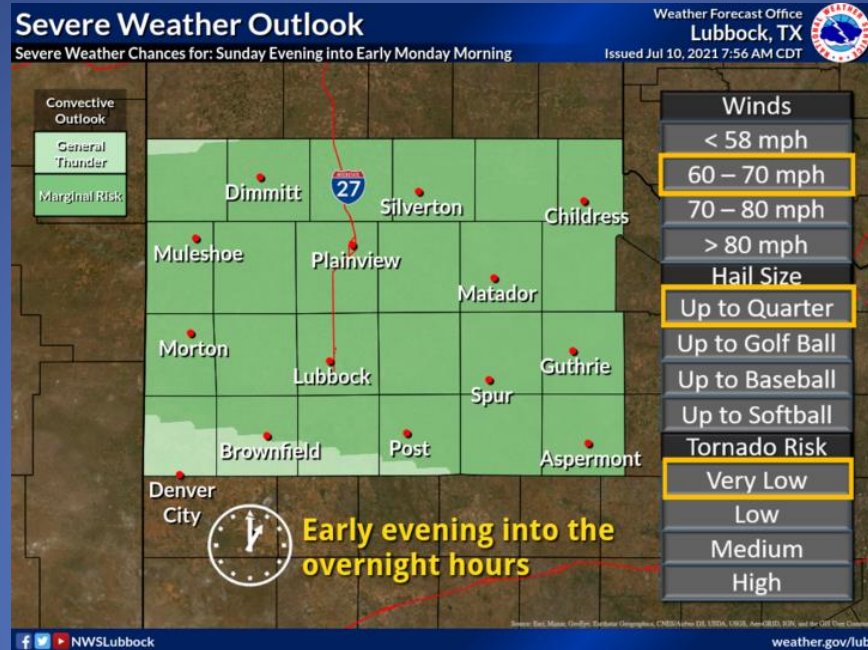

This afternoon and evening

Weather Forecast Office
Midland/Odessa, TX
Issued July 10, 2021 7:58 AM CT

There is a marginal risk of severe storms this afternoon and tonight over portions of Lea and Scurry County. Some of these storms will be capable of producing isolated large hail and/or damaging wind. Locally heavy rain may also result in flash flooding.

Hazardous Weather

There is a marginal risk for severe storms early this evening into the overnight hours. A Marginal risk means that isolated severe thunderstorms are possible. Damaging winds to 70mph and hail to the size of quarters may accompany storms.
